

# LAY AND WALK AWAY

## MARLEY HEAVY DUTY CONDUIT

NO NEED FOR CABLE COVER, QUICKER INSTALL, LESS HASSLE

Our new uPVC heavy duty conduit is designed to be buried underground without needing extra mechanical protection.

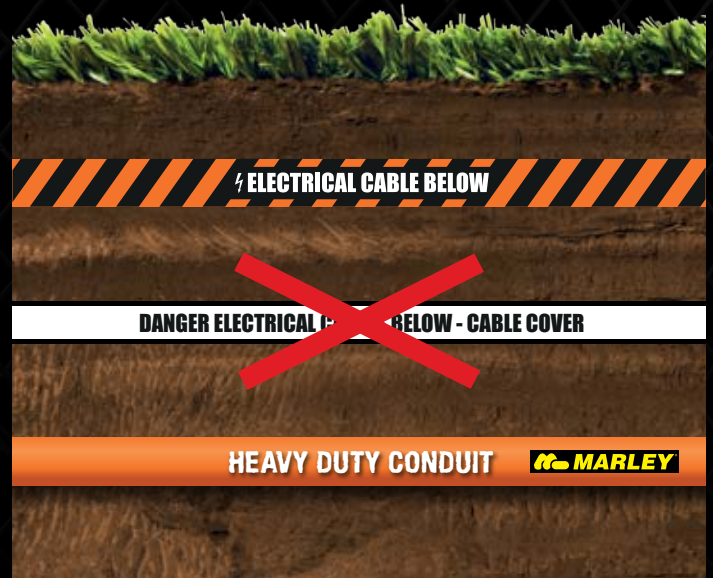

- Greater wall thickness than medium duty (as per AS/NZS 2053)
- Greater impact & compression resistance than medium duty
- Full range of sizes and fittings (20mm–50mm, 4m length)

### AS/NZS 3000 Standard Information

Relating to the duty rating of conduit, AS/NZS 3000 states that for an underground installation:

**Category A** wiring system is heavy duty conduit, without the need for extra mechanical protection

**Category B** wiring system is medium duty conduit, and requires the need for extra mechanical protection
