# Environment

Our natural resources are under continued pressure due to environmental impacts such as earthquakes, flooding and droughts, along with contamination and supply constraints. Add to that the increasing urban density as our cities and towns continue to grow, all placing more demand on water supply, filtration and storage facilities. Why not have your own water supply controlled by you and utilising the clean, free rainwater that's already running through your downpipes. With increasing pressure on water supply and quality it makes perfect sense to become more self-sufficient at home and in the garden.

## Why Marley Twist?

Especially designed to suit New Zealand conditions the Marley Twist® offers a solution to our ever increasing demand for water. The innovative Marley Twist® allows the efficient capture of clean, free water by tapping into your existing downpipe system and the unique Twist® top design means you can easily turn the Twist® on and off as required. Marley Twist® is a great choice for the environment too, utilising the fresh, clean rainwater that is already being channelled through your downpipe system.

**Great for  
gardeners**

**Fish pond**

**Vegetable gardens  
(kids love watering)**

**Water feature**

**Lawn envy in  
the summertime**

**Just in case supply**

**Fill the pool**

# Installation

Easy to use, Marley Twist® can be installed in around 20 minutes. Simply follow the cutting template and installation guide included in the pack or can be installed by a plumber, landscaper or handyman.

Twist® allows the capture of approximately 300 litres of water per hour\*. Marley Twist® can be connected to any existing tank or barrel with standard garden hose fittings. Ideal for watering, general use, water features and swimming pools.

\*Constant moderate rainfall

Once your storage tank is full simply turn the twist top off to resume normal downpipe flow. Marley Twist® is available in a range of Marley colours to allow a perfect colour match to your downpipe. Contact Marley NZ for more information or go to [Marley.co.nz](http://Marley.co.nz).

# curve

Marley Curve® is a great solution if your drains struggle with high leaf content or other fallen debris collecting in your spouting, which could lead to blockages, overflow, damaged pipes and maintenance costs.

When collecting rainwater or on tank supply the last thing you want is a high level of debris travelling through your downpipes and into your water. Marley Curve® leaf diverter combines an attractive, unobtrusive design with an innovative filtering system to deliver cleaner water.

The unique screen of the Curve® design draws rainwater in, while keeping debris out.

To find out more about Marley Curve® go to [www.marley.co.nz/curve](http://www.marley.co.nz/curve)

Available in the Marley Stratus Design Series® range of colours and compatible with RP80° downpipe.

## Sustainable Manufacturing

Marley is committed to creating environmentally sustainable processes and products and was the first plastics manufacturer in New Zealand to achieve ISO14001 registration. We are also Best Environmental Practice certified for our entire range of manufactured uPVC systems. This means we get our raw materials from sustainable and responsible sources, continuously work on our manufacturing processes to reduce our environmental footprint and accept our products back at the end of their useful life for recycling.
