

The Marley RP80® Downpipe System

The best choice for uPVC and metal spouting.

DURABLE

RP80® is the rust, dent and seam free option suitable for any residential spouting installation, including buildings on tank supply. It is made in NZ for our unique conditions and carries a 15 year product guarantee.

FLEXIBLE

RP80®'s compact bend and clip options make installation easy, especially on narrow soffits. You can achieve a transition from outlet to wall using as little as 44mm with no cutting or fabrication.

COLOURFUL

RP80® is available in the full range of Stratus Design Series® colour options: Ironsand®, Grey Friars®, Black, Copper and Titanium.

Marley uPVC Spouting Example

Ironsand® on a narrow soffit

Expansion Outlet

Marley Stormcloud® spouting system

Code: MS8.80

Quarter Round profile

(Marley Typhoon® Half Round system also available)

95° Bends

Codes: RB2.80 + RB4.80

110mm transition

Downpipe

Code: RP80

Adjustable Clips

Codes: RC80.2 + RC80.2S spacers

36mm to 49mm adjustable offset + 15mm per spacer

Stormwater Adaptors

Codes: RA80.90 or RA80.100

80mm to 90mm & 80mm to 100mm options

Notes:

Use only Marley MCS® Solvent Welding Cement to join Marley RP80® pipe and fittings together.

Don't glue the top bend to the dropper. Use a stainless steel screw for ease of removal for cleaning.

All RP80® components are available in a range of colours*

Grey Friars®

Ironsand®

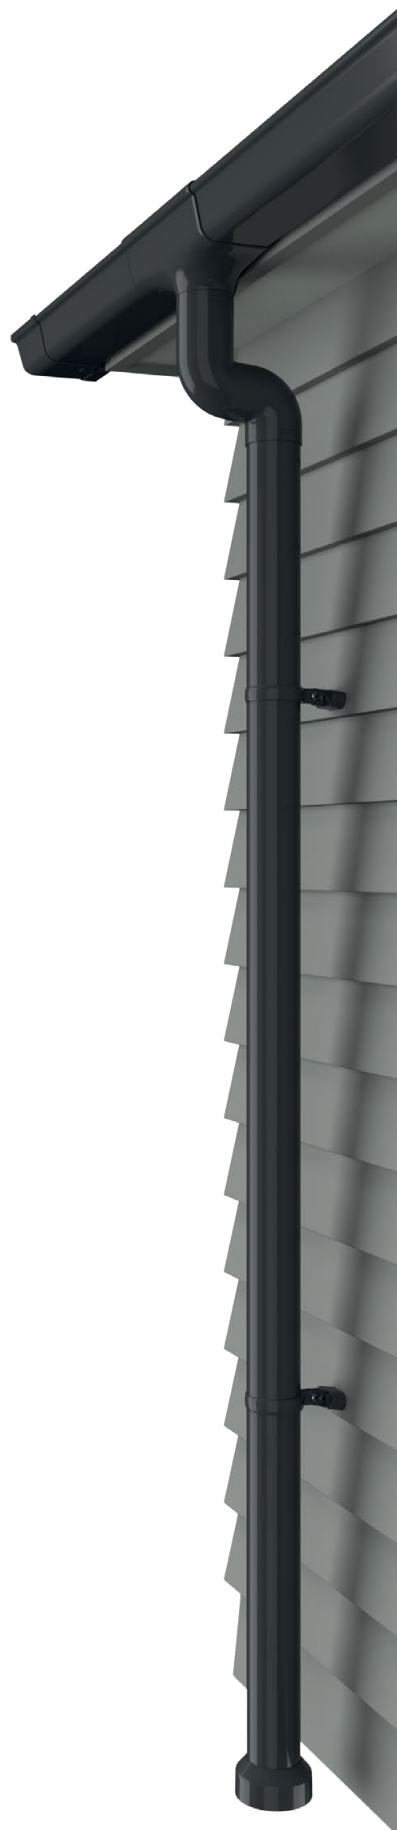

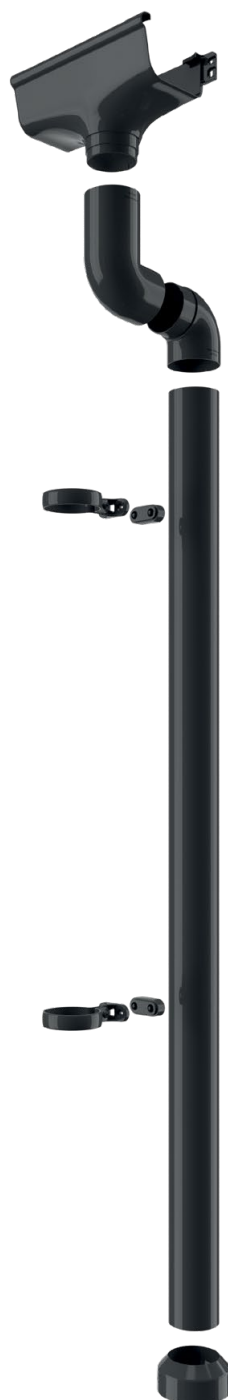

Black

Copper

Titanium

Metal Spouting Example

Grey Friars® on a minimal soffit

Dropper Outlet

Marley RP80®

Code: MC11.80

Cut hole in spouting & insert (with sealant)

43° Bends

Codes: RB3.80 + RB5.80

44mm transition

Downpipe

Code: RP80

Standard Clips

Code: RC80

24mm offset

Stormwater Adaptors

Codes: RA80.90 or RA80.100

80mm to 90mm & 80mm to 100mm options

RP80®'s compact bend options also allow for ease of fit with misaligned stormwater outlets

Notes:

Use only Marley MCS® Solvent Welding Cement to join Marley RP80® pipe and fittings together.

Don't glue the top bend to the dropper. Use a stainless steel screw for ease of removal for cleaning.

Also available for rainwater collection and stormwater management:

Designed specifically for the Marley RP80® downpipe system, Marley CURVE® is a self-shedding leaf diverter that keeps leaves and debris out of rainwater retention and stormwater detention tanks.

This prevents excessive sediment build up, improving system efficacy and reducing maintenance costs.

All RP80® components are available in a range of colours*
